

Design & Build

A pool brings you into the modern times, it is the place in your home where you craft the future, engage in deep thought, and where family and friends are always welcome.

The CBP designation is awarded to only a small number of builders around the world. To achieve the industry's premier designation, an APSP Certified Pool Builder (CBP) has been thoroughly tested and has committed to upholding the highest standards. These standards ensure you are getting the best pool, spa or hot tub product on the market today.

Experience

Applicants must have more than 5 years experience in the field

Expertise

Each APSP Certified Professional has passed a rigorous exam and demonstrated a mastery of topics that include regulations, permitting, building codes, planning, mechanical drawings, construction, excavation, hydraulics, insurance, filtration systems, solar and other heating technologies, electrical issues and code requirements, decks, finishes, cleaning systems, chemicals, and safety and hazardous waste.

Education

Certified Professionals fulfill continuing education requirements to stay current on the latest technological advances, industry developments, and business trends.

Ethical Practice

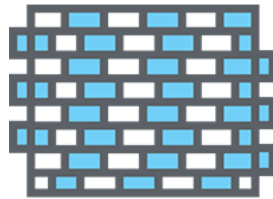

Professionals pledge to uphold APSP's/PHTA's Code of Ethics and comply with the highest business standards and practices, on topics that range from health, safety and public welfare to contracts and product pricing.
